Peek Inside the Book

of the actual objects of physical reality. Physical objects are not in space, but these objects are spatially extended. Albert Einstein, Relativity: The Special and the General Theory //

An observer who is sitting eccentrically on the disc K' is sensible of a force which acts outwards in a radial direction, and which would be interpreted as an effect of inertia (centrifugal force) by an observer who was at rest with respect to the original reference-body K . But the observer on the disc may regard his disc as a reference body which is at rest; on the basis of the general principle of relativity he is justified in doing this. The force acting on...

Reader's Opinions

I hope that no one will ask me what was this book about .
